

## FITTskills Seventh Edition — Course Syllabus

### Course: Global Value Chain

#### Course Description:

The *Global Value Chain* course examines aspects of the primary activities of Distribution and Inventory Management, and the supporting activities of Document Management and Procurement, which are integral to international trade logistics. Doing business in/with foreign markets requires consideration of different regulatory, financial, geographical, cultural and consumer requirements. This course examines how organizations obtain resources and what they need to know to control and manage logistical systems within the global value chain in order to implement strategic business management decisions that minimize costs and risks, and maximize international business potential.

The *Global Value Chain* course is a key course in the Seventh Edition of the FITTskills Program, which has been designed for the independent self-directed learner who is an international trade practitioner with a minimum of two to five years of experience. The FITTskills Program has been developed so that you as a practitioner can ensure you have all the competencies required to take advantage of international trade opportunities.

#### Modules in this Course:

**DOCUMENT MANAGEMENT:** Control, Compliance and Consistency

**INTERNATIONAL PROCUREMENT:** Purchasing and Outsourcing in the Global Marketplace

**INVENTORY MANAGEMENT:** Maximizing Efficiency in Global Inventory Management

**INTERNATIONAL DISTRIBUTION:** Transportation of Goods and Delivery of Services

#### Pre-Requisites:

### Course Format:

You have three months to work through the self-led course and complete the final assessment at your own pace. You'll receive your topic-specific textbook in eBook format. At the end of your learning, you can write the summative exam for the course.

Registration in this course provides you with access to additional learning resources, such as guiding notes, case studies, sample exam questions and the answers to the exercises in the textbook. These additional resources provide you with an opportunity to apply your learning and verify your progress. Although access to these resources are provided, the only requirement to complete the course is successfully passing the exam.

### Learning resources:

The course includes extensive content about the global value chain as an integral part of international trade. It also offers:

- An initial checklist for you to ‘Reflect on Your Experience’ to help you decide which sections you need to spend most time on, and where you may have previous learning
- Case examples that demonstrate innovative and good business practices, global examples and lessons from the field
- Many sample documents to illustrate requirements and good practice within the global value chain
- Sections that help you to consolidate and apply your learning at the end of each unit of each module
- Opportunities for extended learning at the end of each unit of each module to broaden the scope of your application, and to help you relate the learning to specific situations
- A list of ‘Recommended Resources’ for additional reading and learning on the topics

### Assignments & Formative Assessments:

In addition to the sections in each unit to help you apply your learning and to extend your learning to various situations, there is a Final Check at the end of each module. This multiple-choice quiz for the module provides sample questions and answers for you to prepare for the summative exam. These questions have also been provided as an interactive quiz on the learning platform.

### Summative/Final Assessment:

Once you are ready, you can write the course evaluation. This is a standardized open-book exam consisting of 45 multiple choice questions. Learners must complete this exam online within three hours. You can write your exam at any time as long as it is done before the deadline.
